Summary

An aspiring **software engineer** with a solid foundation in computer science and hands-on experience in building and maintaining full-stack web applications. Passionate about creating **robust, scalable** systems and solving real-world problems with **clean, efficient code**. Skilled in **Java**, JavaScript, and Node.js, with working knowledge of system design, operating systems, databases, and networking fundamentals. A fast learner and collaborative team player, eager to contribute, take ownership of meaningful projects, and grow in a fast-paced and agile environment focused on quality at scale.

Technical Skills

Frontend Frameworks: ReactJS, NextJS, HTML, CSS, Tailwind

Backend Frameworks: Node.js, Spring and SpringBoot, Express.js

Programming Languages: Java, JavaScript, Python, C/C++

Database Management: MySQL, MongoDB, PostgreSQL

Tools: GitHub, Git version control, Looker Studio, IntelliJ IDEA, Vscode, AWS

Projects

Personal Portfolio Website - [Github link](#)

adarsh-portfolio-website.app

- Developed using Next.js, TypeScript, Aceternity UI, FramerMotion, and Tailwind CSS to showcase my projects.

Blockchain Group Chat Application - [Github link](#)

- Built a decentralized group chat platform using Ethereum, Solidity, Hardhat, Web3.js, React, and Express.js.
- Enabled wallet-based authentication and on-chain message storage via MetaMask and smart contracts.
- Implemented real-time chat updates using WebSockets for a seamless user experience

Secure Carbon Footprint Tracking using Blockchain - [Github link](#)

[Publication Link](#)

- Developed the front-end of a decentralized web platform for transparent and tamper-proof carbon emission tracking as part of an academic project, using React and Tailwind CSS for a responsive and modern UI.
- Published Paper: "Blockchain-Based Carbon Footprint Verification and Management", Int. J. Environ. Sci., pp. 2156–2165, Aug. 2025, doi: 10.64252/t208b873.

Video Chat Application - [Github Link](#)

videochatappwebrtc.app

- Developed a real-time video calling and messaging platform using WebRTC, Socket.io, Node.js, and React.
- Implemented features such as mute / unmute, video toggle, and private chat rooms.
- Deployed full-stack solution on Render (backend) and Vercel (frontend) for seamless accessibility.

Volunteering

IEEE-CRCE Technical Council

Secretary:

July 2025 – To date

- Promoted to the position of Secretary of the IEEE Council

Vice Chairperson:

July 2024 – July 2025

- Conducted *Ingenium 2024* - Group Discussion Competition
- Successfully Organised *Prakalp 2k25 3.0* - A National Level Project Competition with more than 500 participants (hardware and Software), secured *1.2 lakhs* of Sponsorship Amount

Extra Achievements

- Pitched and secured pre-incubation for a blockchain-based secure carbon footprint tracking startup at MU Ideas Incubation Center, University of Mumbai, gaining exposure to the startup ecosystem.
- Solved 150+ Data Structures and Algorithms problems on LeetCode and HackerRank; actively build a professional network with 900+ LinkedIn connections. [Profile Link](#)

Education

Fr. Conceicao Rodrigues College of Engineering, BE in Computer Engineering

Nov 2022 – June 2026

- CGPA: 7.75/10 (*Honors in Data Science*)
- CS Fundamentals - Operating Systems, Data Structures, Algorithms, Software Engineering, Computer Networks, DBMS.
