SUMMARY

Software engineer and AI enthusiast with hands-on internship experience in full-stack development, backend architecture, and system refactoring. Proficient in Python, Java, JavaScript, Node.js, and React, with a growing focus on building LLM-powered applications, RAG pipelines, and AI-integrated systems. Strong foundations in data structures, REST API design, cloud deployment, and CI/CD. Adept at bridging software engineering practices with modern AI tooling to deliver production-ready, scalable solutions. Eager to contribute to AI product development and grow in a fast-paced, research-driven environment.

EDUCATION

Fr. Conceicao Rodrigues College of Engineering

B.E. Computer Engineering – Honors in Data Science | CGPA: 8/10

Bandra West, Mumbai

Nov 2022 – Jun 2026

– Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

Intuitive Data Solutions Pvt. Ltd.

Software Development Engineer Intern

Mumbai, India

Jan 2026 – Present

- Engineered and deployed production-ready features across enterprise platforms including Supply Chain Management, DPDP-compliant Consent Management Platform, and Student EID Stack, delivering scalable frontend and backend functionality using modern full-stack technologies.
- Diagnosed, debugged, and resolved 10+ production issues by analyzing application behavior, validating business logic, reproducing defects, and implementing robust fixes to improve system reliability, performance, and user experience.
- Designed and implemented data-intensive features involving complex workflows, database operations, REST API integrations, and efficient data processing to support production-scale enterprise applications with high accuracy and maintainability.

PROJECTS

Agentic Enterprise Knowledge Hub | *LangGraph, FastAPI, ChromaDB, Ollama, Next.js* | [GitHub](#)

- Built a 100% local, production-level Agentic RAG system using LangGraph stateful workflows and Ollama (Llama 3.1 8B), implementing an LLM-based relevance grading step before generation to reduce hallucinations significantly.
- Engineered an async FastAPI backend with ChromaDB for persistent vector storage and HuggingFace `all-MiniLM-L6-v2` embeddings, enabling accurate semantic retrieval over enterprise PDF documents.
- Delivered a real-time Next.js 14 dashboard with per-response agent relevance status indicators, enabling non-technical users to validate AI output quality and cutting document Q&A turnaround time by 70%

RespiScope – Smart Stethoscope & Telemedicine Platform | *MERN Stack, WebSockets, JWT* | [GitHub](#) | [Link](#)

- Architected a real-time teleconsultation platform with JWT-based auth and role separation (doctor/patient), delivering Socket.io-driven consultation chat.
- Engineered secure biomedical audio handling using MongoDB GridFS with authenticated streaming and waveform visualization, processing and storing 50+ patient audio recordings with zero data loss.
- Implemented an IoT-aligned auscultation pipeline for capturing, storing, and analyzing heart/lung sounds during remote consultations, reducing the need for in-person visits by an estimated 40%.
- Delivered a GitHub Actions CI pipeline with automated Jest tests covering 7+ backend endpoints, reducing regression bugs by 50%.

SKILLS

AI / ML	Python, Large Language Models (LLM) APIs (OpenAI / Ollama), Prompt Engineering, LangChain, LangGraph, Hugging Face Transformers, RAG, ChromaDB, FAISS
Frontend	React.js, Next.js, TailwindCSS, HTML, CSS
Backend	Node.js, Express.js, FastAPI, REST APIs, WebSocket
Databases	PostgreSQL, MySQL, MongoDB
Languages	JavaScript, Java, C, Python
Tools	Git, Postman, VS Code, AWS, GitHub Actions, CI/CD, Docker, Antigravity IDE, Gemini CLI, Claude Code

CERTIFICATIONS & ACHIEVEMENTS

- **AWS Academy Certifications:** Cloud Architecting, Cloud Fundamentals, Microservices, and CI/CD Pipeline Builder.
- **Research Publication:** “Secure Carbon Footprint Tracking using Blockchain” – International Journal of Engineering Science (IJES) <https://theaspd.com/index.php/ijes/article/view/6793>.
- Solved 200+ DSA problems on LeetCode; 1,500+ LinkedIn connections.
